Professional Summary

Results-driven Computer Science graduate with hands-on experience in DevOps, Cloud (AWS, Azure), Linux, Docker, CI/CD, Infrastructure Automation, MERN Stack, Machine Learning and AI model evaluation. Built multiple production-style projects and DevOps Proof of Concepts using Git, Docker, Terraform, Azure DevOps, GitHub Actions and AWS. Strong problem-solving skills with experience collaborating in agile teams.

Experience

DevOps Intern, HCLTech

Apr 2026–Present

- Completed hands-on PoCs in Linux, Git, Docker, Azure DevOps, AWS, CI/CD and automation.
- Worked with infrastructure, virtualization, networking and deployment workflows.
- Learned enterprise DevOps practices, monitoring and incident workflows.

LLM Post Training Intern, Ethara.ai

Feb 2026–Apr 2026

- Evaluated LLM responses for reasoning, accuracy, safety and instruction following.
- Improved model quality through response ranking and annotation.

Freelance Web Developer

Aug 2024–Sep 2024

- Built responsive web applications using HTML, CSS and JavaScript.
- Improved UI performance and cross-browser compatibility.

Skills

Python, Java, JavaScript, TypeScript, C/C++ (basic), HTML, CSS, React, Node.js, Express.js, MongoDB, MySQL, Linux, Git, Docker, Azure, AWS, CI/CD, Terraform, GitHub Actions, Azure DevOps, Machine Learning, FastAPI, OpenCV, YOLOv8, REST APIs.

Projects

Sentinel AI

- AI surveillance system using YOLOv8, DeepFace, FastAPI, MongoDB and TypeScript.
- Real-time weapon detection, face recognition and Telegram alerts.

UniFY

- MERN-based university social media platform with authentication and REST APIs.

Serverless Authentication

- MERN authentication with secure credential storage.

Credit Risk Management

- ML model predicting default probability and expected loss.

Education

Malla Reddy University

B.Tech Computer Science and Information Technology, CGPA: 9.2

Certifications

NPTEL Programming in Java

NPTEL Cloud Computing
